Step 4: Partial Airdrops (156 out of 769)

- TyLekki's 1/1 HODLers: 45
- 6529 Gradient HODLers: 20 (out of 101 tokens)
- 6529 Meme Card HODLers: 91 (out of 3,208 HODLers)

The airdrop is only for the 91 full set HODLers of Meme Cards.

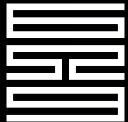

- The random number generation method will be used to select only the Gradient airdrop recipients.
- Specifically, the selection process is organized as follows:
  - It applies equally to every token in a collection
  - Each piece has an equal chance of being selected.
  - In other words, there is no need to segregate tokens across various addresses to increase your chance of success if you own multiple tokens in a collection
  - The mechanics of the process are publicly auditable and as described in the randomization process
